

Tidal Washers

Name:

Tidal Efflorescence Eraser

Product Code:

4026

Description:

Tidal Efflorescence Eraser is a blue, acidic liquid whose main ingredient is phosphoric acid (10%-20% by weight). It removes the accumulation of efflorescence from brick, stucco, and other types of masonry. This is an imperative aspect of prepping masonry for sealing, as efflorescence hinders a sealant's ability to stick to and permeate a given material.

Benefits:

- Contains no hydrochloric or hydrofluoric acid
- Each gallon of Tidal Efflorescence Eraser can clean a 200-square-foot surface
- Is readily rinsed off
- Nonflammable

Applications:

- Tidal Efflorescence Eraser is a solution that will help prepare masonry for the sealing process by cleaning off built-up efflorescence.
- Before use, dilute Tidal Efflorescence Eraser to a concentration of 1 part product to 3-4 parts water.
- Spot test Tidal Efflorescence Eraser on a small portion of masonry to decide if it needs to be stronger or weaker.
- Administer Tidal Efflorescence Eraser to a wet surface using a pump-up sprayer.
- Let sit for a short time, then rinse off with high pressure water.
- Wait at least 48 hours after applying Tidal Efflorescence Eraser to use sealant on the masonry's surface.

Product Information:

Concentrate Mixed

Part No.	Size	Weight
4026-1	4x1 Gallon Case	40 lbs.
4026-5	5 Gallon Pail	50 lbs.
4026-55	55 Gallon Drum	400 lbs.

Technical Data:

Color:	Blue
Odor:	Characteristic
pH:	<2

Safety:

Contains Phosphoric Acid

Keep out of reach of children. Do not handle until all safety precautions have been read and understood. Use eye, face, and rubber glove protection when handling these contents. Do not store at temperatures above 120 ° F. Do not allow to freeze.
